

# A PARTNER FOR PROGRESS

**LANDOWNER  
RELATIONS**

# LANDOWNER RELATIONS

Select Energy Services' Landowner Relations take a proactive role in creating a dialogue with landowners, communities, operators, local agencies, and state agencies where petroleum and natural gas activities may or currently occur.

## EXPERIENCE BUILT ON TRUST

It's our landowners that have entrusted Select Energy Services with the opportunity to provide mutually beneficial services during field development. As we continue to grow as one of the largest water providers in the oil and gas industry, each landowner, commissioner, and stakeholder becomes a valuable resource to the local community and government and a partner to Select.

## OUR MISSION

### MINIMIZE OUR FOOTPRINT

Select has a goal of minimizing the impact we have on the land we utilize, which includes reducing interference with our landowner's property and operations, and reducing the footprint of our equipment, trucks, tools, and employees.

### A HIGHER STANDARD

Driving top level performance means holding our teams to a higher standard and involving everyone in the process of Landowner Relations, including an end-of-job report card process with the landowners themselves.

### OUR COMMUNITY

Our goal to improve Select Energy's positive reputation and visibility within communities, outreach programs and local events is key to strengthening the partnerships we have with our landowners and customers.

### OUR INDUSTRY

Select is one of the only service companies with a dedicated team to address landowner issues for the operator to expedite a resolution with minimal impact and down-time for the operator and field operations.

### IN IT FOR THE LONG RUN

We believe we can secure long-term partnerships with customers by working with communities and landowners, conveying and addressing their interests, in order to improve job efficiency for our operating partners.

## RELATED SERVICES

### WATER SOURCING

Our Sourcing team has extensive experience working with state water regulatory agencies and conservation districts to secure the proper permits, ensure water quality, and procure the right-of-way for the intended use.

### WATER TREATMENT

Our Water Treatment team utilizes a spectrum of bio-control and recycling technologies to prepare source water to go down-hole on-the-fly or tie flowback water back into frac supply for reuse.

### WATER STORAGE AND TRANSFER

The Select Water Transfer team specializes in high-volume, high-rate water transfer services through a variety of mobile piping systems and high volume water storage, including environmentally safe, anti-leak pipe systems, like lay-flat hose, to support fracturing.

### WATERONE™ AUTOMATION

WaterONE Automated Systems use multiple sensors and proprietary programming to operate and maintain water networks, extend the life of water sources, and improve safety.
