

FULL SERVICE WATER MANAGEMENT

To create energy, it takes energy. It takes manpower, experience and an intelligent, smarter way of thinking. That's where we come in. We are Select Energy Services, a **100% water focused**, comprehensive water management provider. We believe our true value lies within the hard work, proven experience, safety and customer-centric solutions we are able to bring to each and every project—every time.

Water Sourcing

With immediate access to extensive water supplies for operator use in hydraulic fracturing, Select Energy Services' Water Sourcing service line was established to support operations in identifying, acquiring and permitting source water. Our Water Sourcing experts' capabilities include water acquisition, storage and accumulation, evaluation, regulatory handling and transfer at every stage of the water cycle.

Containment

Proper management of large volumes of fluid has become a necessity as hydraulic fracturing has increased throughout North America. Select water and logistics professionals have extensive training and experience in advising and executing the optimal containment plan for your operation, including above ground storage options up to 62k bbl. Supporting services include water transfer, containment assembly, fluid fill and complete removal for disposal as well.

Water Transfer

Our Select Water Transfer service line specializes in high-volume, high-rate water transfer services through a variety of mobile piping systems including environmentally safe, anti-leak pipe systems to support hydraulic fracturing. Water transfer services also offer a cost-effective alternative to trucking, which tangles up more resources, takes longer and can impact roadways.

At Select Energy Services, **safety is our #1 Core Value.** We strive to create a world-class safety culture through smarter safety communication, extensive training, and continuous improvement. We have a comprehensive HSE Management System that provides the framework for operations to achieve top performance. We invest in tools that help us analyze data collected in the field and generate easy-to-understand reports that are used to make smart and proactive decisions every day. At Select Energy Services, we are fully committed to provide a safe working environment for our people and our customers, protect the environment, and to give back to the communities where we live, work, and operate.

Flowback & Well Testing

Select's Well Testing and Flowback services provide solutions with regionally specialized equipment and knowledge, spanning the national footprint. Our personnel are highly trained—allowing us to provide site-by-site consulting with the knowledge to act safely and effectively.

Fluid Handling

Tidal Logistics is Select's Fluid Handling service line which includes a large fleet of owned and operated fluid service trucks capable of hauling up to 130 barrels. Tidal's fleet is comprised of vacuum trucks, winch trucks, and hydrovacs, which are positioned across North America, improving responsiveness to your fluid hauling needs.

Fluid Disposal

Select's Disposal service line is equipped with permitted disposal facilities positioned throughout the major U.S. shale plays with over 100K barrels per day (bpd) disposal capacity. Select Energy Services' owned and operated saltwater disposal facilities are available for saltwater and incidental non-hazardous oil and gas waste disposal. Our team of geologists and landmen strategically identify each location, and each facility is built with the environment, safety and convenience of our clients and communities in mind.

Water Treatment

Our Water Treatment team utilizes a spectrum of bio-control and recycling technologies to prepare source water to go down-hole on-the-fly or tie flowback water back into frac supply for reuse. Our team continually evaluates and updates our portfolio of technology partners to reflect the rapid change of pace in our industry. We are able to identify optimized solutions that address regional objectives for environmental safety and compliance as well as water rationing.

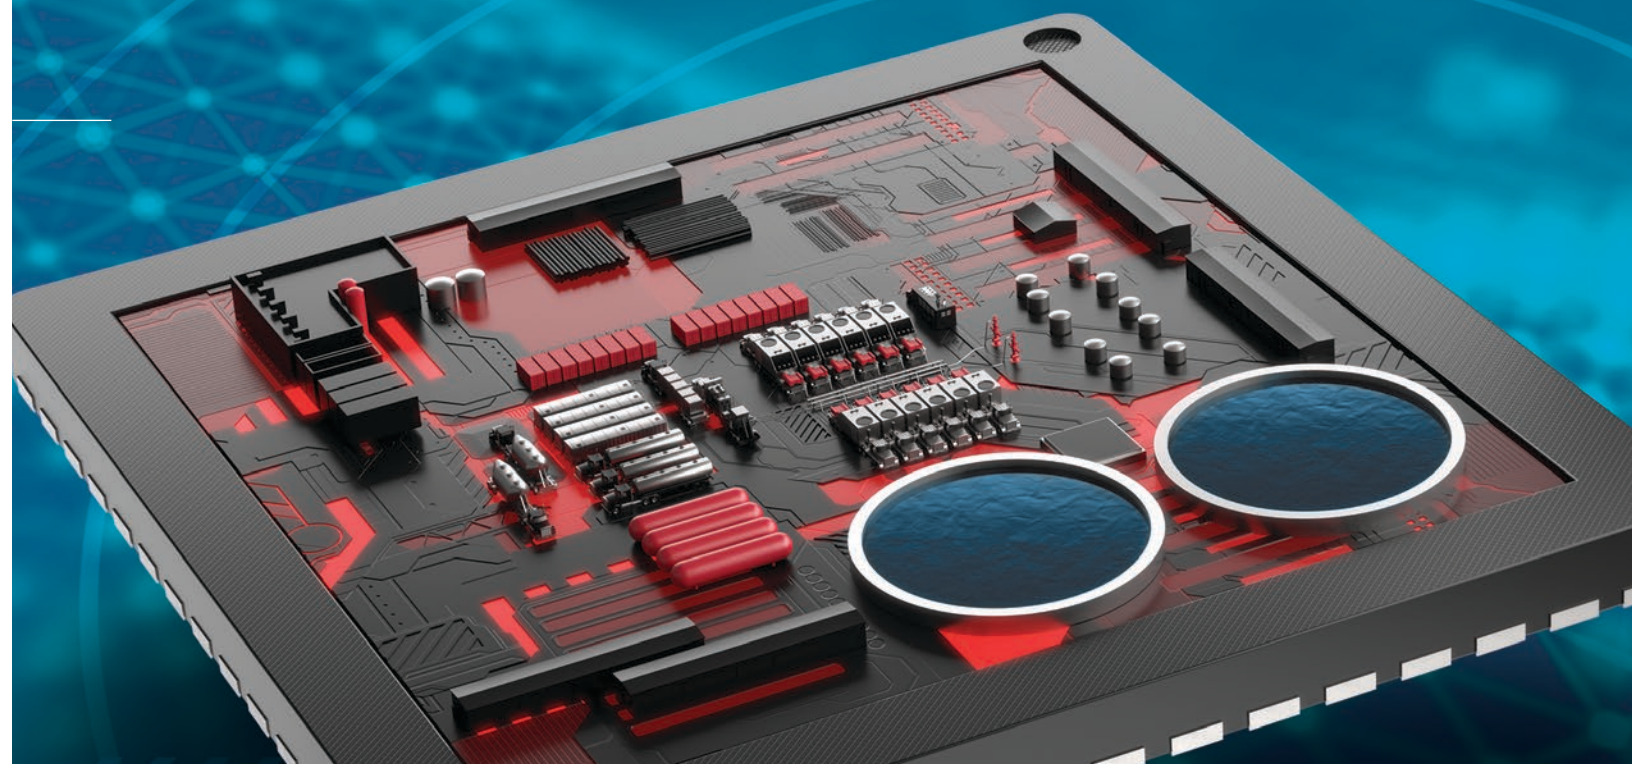

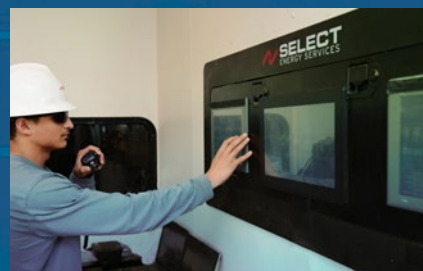

WaterONE™ is a proprietary water management technology that gathers, interprets and responds to data in real-time—all with limited human intervention. Through Select Energy's patented WaterONE services, true automation is possible. Oil and gas operators are now equipped with ultimate control over their water management operations —improving safety and efficiency.

WHAT IS TRUE AUTOMATION?

- + AUTONOMOUS EQUIPMENT THAT TAKES INDEPENDENT ACTION
- + STORAGE DRAW-DOWN TRIGGERS RESPONSE ACROSS ALL EQUIPMENT
- + REAL-TIME MONITORING AND REPORTING OF CRITICAL INFORMATION
- + IMPROVES SAFETY THROUGH IMPLEMENTATION
- + ALWAYS VISIBLE WITH SOLAR POWERED PLC
- + INTEGRATION WITH TREATMENT AND WELL CHEMICAL PROGRAMS

THIS IS OUR BACK- YARD.

With a presence in every major U.S. shale play and basin, **we're right where you need us.**
