

The background features a large, stylized graphic of a water drop or splash, rendered in a dark blue color, set against a lighter blue background. The graphic is composed of several overlapping, curved shapes that create a sense of motion and volume. The overall aesthetic is clean and modern, with a focus on water-related imagery.

WATER TRANSFER

SOLUTIONS
THAT SPEAK
VOLUMES

WATER TRANSFER

The Select Water Transfer service line specializes in high-volume, high-rate water transfer services through a variety of mobile piping systems and storage options, powered by proprietary automation to support hydraulic fracturing and produced water treatment.

FRAC SUPPORT

Select Frac Support provides continuous supply and management of water for fracturing operations. This involves trained operators to install and monitor pipelines, pumps, tanks, manifolds, pressures, and as needed water trucking, filtration, and in-line heating. Our teams coordinate closely with customers and to maintain required flow rates and water quality to enable continuous fracturing operations.

AQUAVIEW® AUTOMATION AND MONITORING

Knowing accurate real-time water data is crucial to reducing costs, improving safety, and maintaining completion schedules. Frac supervisors can securely track water assets any time, any place with a customized portal and alert system. Automated equipment, including pumps, manifolds, and proportioning systems respond to operator specifications and changing conditions in real-time.

ABOVE-GROUND STORAGE SOLUTIONS

Reduce your footprint on location with above-ground storage tanks engineered for strength and quick assembly. Our high capacity tanks replace the need for in-ground pits and frac tanks allowing you to meet environmental regulations while reducing your costs, traffic, and dust to haul in frac tanks.

PRODUCED WATER EXPERTS

Select excels in managing the equipment requirements and addressing the chemical and environmental challenges associated with produced water transfer. Typically this includes semi-permanent rigups with disposal wells, pits, flowback operations, and water treatment impoundments. Additionally, Select offers comprehensive flowback and well testing services.

WATER TREATMENT

Our experts offer the spectrum from simple call-out filtration up to sophisticated best-in-class cost-effective project solutions. Select offers a variety of available options and consultation when it comes to disinfection and recycling solutions.

Water Sterilization, reuse and recycle solutions

- Aeration
- Conventional Biocides
- Systemized Chlorine Dioxide
- Chemical Clarification
- Filtration
- PreSliq™ Drag Reducers

PROCESS

Through our collaborative 4-Step process, we can develop a complete solution for water delivery and removal to fit your unique situation.

STEP 1: PROJECT DESIGN & PROCUREMENT

STEP 2: PHYSICAL CONSTRUCTION

STEP 3: TRANSFER

STEP 4: PROJECT DECONSTRUCTION

EQUIPMENT

- TIDELINE™ LAY-FLAY HOSE & POLY
- AUTOMATED PUMPS
- AUTOMATED MANIFOLDS
- ROAD CROSSINGS
- CONTAINMENT & STORAGE
- FILTRATION EQUIPMENT
- SUPPORT RENTALS
